### Product

Granite Rapid Rust Remover

### Features

Granite Rapid Rust Remover is suitable for natural granite, artificial stone, ceramic tiles, etc. It deeply removes stains, rust stains, mold, yellow spots, and efflorescence. After use, it prevents yellowing recurrence and does not alter the stone's color.

### Method of Application

- 1.Can be used directly on stone surfaces. Dilute with water at a ratio of 1:1 to 1:5 depending on the level of soiling.
- 2.For light stains: Dilute with water at a ratio of 1:5, then pour directly onto the area to be cleaned. Gently scrub or clean with a washing machine within 5–20 minutes. Repeat the process until stains are removed.
- 3.For heavy stains: No dilution required. Pour the product directly onto the soiled area, or cover the stained area with a clean white cloth or tissue and soak with the rapid rust remover. Gently scrub or clean with a washing machine within 15–30 minutes. Repeat until stains are removed.
- 4.If there is wax or oil on the stone surface, remove it first and rinse thoroughly with water before starting the cleaning process.
- 5.Remove the solution with a sponge, damp cloth, or vacuum cleaner, then rinse thoroughly with clean water until all cleaning agent is completely removed.
- 6.To avoid accidents, allow the cleaned area to dry completely before reuse.
