### Product

HP Stone High-Speed Polish

### Features

HP is formulated with unique ultra-fine crystal particles. The gentle friction generated by a soft scouring pad activates its active ingredients through minimal heat, prompting them to penetrate the stone's molecular structure. This process forms a high-strength crystal protective film on the stone surface, enhancing its natural luster and creating a crystal-clear, moist texture. The crystal film features exceptional wear resistance, slip resistance, high gloss, and superior water and stain resistance. It is easy to apply, highly efficient, and particularly suitable for large-area applications.

### Range of Application

Marble, granite, artificial stone, polished tile, terrazzo, etc.

### Method of Application

- 1.Clean the stone surface and allow it to air-dry thoroughly.
- 2.Spray the HP onto the floor at a rate of 5-10 ml per square meter. Use a high-speed polisher or crystallizing machine with a 3M white pad.
- 3.Polish the surface evenly until dry. After 1-2 minutes of polishing, a high-strength crystal protective film will immediately form on the stone surface. Repeat the process if necessary.
- 4.Newly renovated granite or polished tiles can be directly polished. For marble, artificial stone, or terrazzo that is newly renovated or heavily worn, pre-treat with Blue Shield or Green Shield before polishing.
- 5.Use a dust mop to clean the floor thoroughly, and the operation is complete.

### Technical Data

Net Volume	Packaging	Physical State	Colour	pH
1 Gallon	4 Bottles / Carton	Liquid	White	3-4

### Storage and Safety

- The storage temperature should be above 0°C and the container should be well-sealed.
- Avoid contact with eyes. If it accidentally enters eyes, rinse immediately with plenty of clean water for at least 15 minutes; seek medical attention if irritation persists.
- Do not take orally. If swallowed, do not induce vomiting; rinse mouth with water and seek immediate medical advice, bringing this data sheet if possible.
- Keep out of reach of children and pets. Do not smoke, eat, or drink during application to avoid ingestion.
- TO BE USED EXCLUSIVELY BY PROFESSIONALS. Ensure the work area is well-ventilated during application. It is recommended to use personal protective equipment. Read the Method of Application before use.
