Product

PVC Super Wax Polish

Features

PVC Super Wax Polish adopts a high-efficiency brightening formula from South Korea. When used with a high-speed polisher, it simplifies daily maintenance, quickly forming a glossy and transparent protective film. It offers long-lasting gloss and wear resistance, significantly enhancing the cleanliness and brightness of PVC floors.

Range of Application

Plastic floors, PVC floors, etc.

Method of Application

- 1.Clean the floor and allow it to air-dry.
- 2.Spray the PVC Super Wax Polish onto the floor, then use a flat mop to apply it evenly over the surface. Wait for the floor to dry completely before reapplying the wax. For the first use, 3-4 coats are required. For daily maintenance, simply remove the surface wax layer with wax stripper and reapply a fresh coat of wax.
- 3.For high-gloss requirements, once the wax layer is completely dry, polish the floor with a high-speed polisher.
