### Product

SP Stone Coloring Agent (Black)

### Features

SP is a long-lasting, fast-drying, and vivid coloring agent, suitable for various stones such as granite and marble. It can alter the original surface color of stones, enhance their surface brightness, and resist fading in all weather conditions, giving stones a colorful and elegant new appearance. Free from corrosive ingredients, it allows for waxing after application. In addition to black, stone coloring agents in other colors—including red, white, green, yellow, brown, and dark brown—are also available.

### Range of Application

Granite, marble, and other types of stone.

### Method of Application

- 1.Ensure the stone surface is clean and free of any coatings.
- 2.No dilution is required. Apply evenly to the stone surface using a brush, roller, or cotton yarn (coverage: 1L per 15-30m<sup>2</sup>). Once dry, wipe off any surface dust.
- 3.After approximately 10 minutes, once the surface is dry, use Green Shield with 0# or 1# steel wool for crystallizing treatment.
- 4.Remove dust with a dust mop to complete the process.

### Technical Data

Net Volume	Packaging	Physical State	Colour	pH Value
1 L	12 Bottles / Carton	Liquid	Black	pH <2

### Storage and Safety

- The storage temperature should be above 0°C and the container should be well-sealed.
- Avoid contact with eyes. If it accidentally enters eyes, rinse immediately with plenty of clean water for at least 15 minutes; seek medical attention if irritation persists.
- Do not take orally. If swallowed, do not induce vomiting; rinse mouth with water and seek immediate medical advice, bringing this data sheet if possible.
- Keep out of reach of children and pets. Do not smoke, eat, or drink during application to avoid ingestion.
- TO BE USED EXCLUSIVELY BY PROFESSIONALS. Ensure the work area is well-ventilated during application. It is recommended to use personal protective equipment. Read the Method of Application before use.
